

Your independence, supported by CPSN.

Thoughtful supported independent living solutions, co-created with our clients and their families for people with Cerebral Palsy and other like conditions.

“The atmosphere was nothing but friendly and the best part was everyone worked towards one goal which was making sure we provide the boys with best care possible”

– Rick, CPSN Rostering Officer

Tailored Supported Independent Living

Client-centric approach

CPSN’s SIL model is developed through active collaboration with clients and their families. By involving them in the planning process, we ensure unique needs, preferences, and desired outcomes are central to the support we offer.

A real home environment

We collaborate with our clients to create a home that suits them – a space to relax with friends, enjoy a barbecue, or unwind with a movie. It’s more than a house... it’s where they feel safe, and happy, nurturing comfort, familiarity, and belonging.

About CPSN

We’re a boutique NDIS provider that specialises in Cerebral Palsy and like disabilities. With 30 years in the sector and a number of staff with lived experience of CP, we have a deep understanding of the sector and pride ourselves on the ability to provide highly customised Independent Living Solutions.

In-home support, so you can thrive

Capacity building

Our in-home support enables and supports skill development to enhance your ability to live independently. This may include assistance with communication, mobility, social connection, and other life skills based on your goals.

Flexibility

We recognise the forever-changing nature of individual needs and that circumstances evolve. Our adaptable approach ensures that support can be adjusted to meet changing requirements while maintaining the highest standards of care.

24/7 support

We offer 24/7 support with four to eight shifts daily, ensuring assistance whenever needed. This includes personal care, mealtime and medication management, and help with daily activities, delivered by support workers.
